Art Unit: 2832

1. This Paper replaces the prior paper No. 10 in its entirety, applicant informing Customer Service 2800 that the action was not received due to an incorrect mailing address by the Office and Customer Service informing the examiner of same.

2. Applicant's election with traverse of Group II, claims 8-10 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that a complete search for one would encompass a complete search for the other. This is not found persuasive because quality examination involves more than a search, assuming arguendo the searches overlap. Thus the burden of two examinations would be serious, as the inventions are independent and distinct.

The requirement is still deemed proper and is therefore made FINAL.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Murakami et al.

Murakami discloses the claimed invention at Figs. 1-2 with thinner-walled portion 3, thicker-walled portion 8a, resistor 2, and substrate 1.

5. Claims 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The claims are allowable because there is no suggestion for the claimed limitations in the combination, where for claim 9, the layers 9,10 of Murakami preclude contact of

the second conductor pattern 7 with the thicker-walled portion 8a, and where for claim 10, the thinner-walled portion 3 of Murakami has a thickness range falling in the claimed thicker-walled portion thickness range.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl Easthom whose telephone number is (703)308-3306. The examiner can normally be reached on M-Th. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad, can be reached on (703)308-7619.
